

OUTSIDE THE WIRE (OTW) TURBO FAN

The OTW Turbo Fan goggle is reliable, effective, lightweight and quiet. The fan efficiently and silently evacuates moist air out and away from the inner lens to keep you fog free. Our system will move 50% more cubic inches of air at a 40% lower decibel level than the competition. So sweat it out. The OTW Turbo Fan will be there to keep it under control.

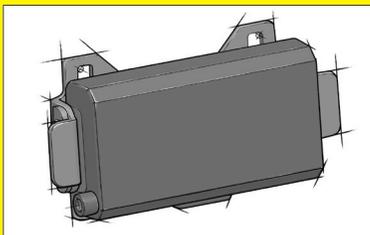

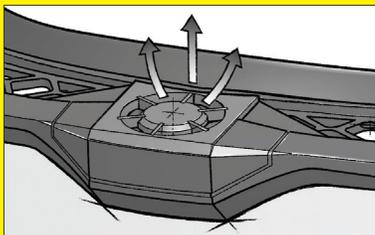

Black

1. Meets US Mil Spec **MIL-DTL-43511D**, **ANSI Z87.1-2003** and **CE EN166** standards
2. Two speed options to adjust to your activity level
3. Easy on/off button can be operated with gloves on
4. Operates with two AAA batteries
5. Auto shut off to preserve battery life
6. Water and dust resistant battery housing
7. Low profile fan housing does not interfere with brim of helmet
8. Compatible with Smith Elite Interchangeable Rx system

OTW TURBO FAN TECHNOLOGY

Move moist air efficiently away and out to prevent fogging.

Fan housing is integrated into the frame for the lowest profile under helmets. Fan moves 50% more cubic inches of air at a 40% lower decibel level than the competition.
